In October 2016, IATF 16949:2016 has been published by IATF and will supersede and replace the current standard of ISO/TS 16949, defining the requirements of a quality management system for organizations in the automotive industry. The new standard has been aligned with and refer to the latest ISO quality management system standard, ISO 9001:2005. IATF 16949:2016 has followed ISO9001:2015 standard structure and requirements. IATF 16949:2016 is not an independent quality management standards, but is implemented as a supplement and joining with ISO 9001:2015.

课程助益

By completing the training course, the candidate will:

- Understand of ISO 9001:2015 and IATF 16949:2016;
- Know the clauses to the intent of the standard and the linkage by using process approach;
- Mapping of various processes in relation to the requirements of IATF 16949:2016;
- Identify customer oriented processes and the applicable customer specific requirements;
- Learn about the terms in ISO9001:2015 and IATF 16949:2016, including the risk based thinking;
- Explore linkages to Core tools: APQP, PPAP, FMEA, SPC and MSA;
- Develop basic and practical QMS audit skills, how to plan and execute the audit process.
